Player Assessment (4-Corner Model)

Technical / Tactical:	Displays high tactical intelligence, understanding when to drop deep to receive the ball and when to make forward runs. Excellent at executing through-balls. Needs to improve decision-making in overloaded situations
Physical Attributes:	Good agility and acceleration over short distances. Strong core stability. Lacks top-end speed for breaking away from fast defenders. Stamina is good for 90 minutes.
Psychological:	Confident on the ball and not afraid to take risks. Shows resilience after making a mistake. Can sometimes show frustration if the game is not going his way.

Social:	A positive and vocal teammate on the pitch. Well-respected within the squad and communicates effectively with both players and coaching staff.

Development & Action Plan

Performance Summary:	Alex had a very productive month, demonstrating significant influence in the final third. His ability to create chances for others was a standout feature, although his finishing can be more consistent
Key Strengths:	Excellent vision and passing range. High work rate in both attack and defense. Great first touch and control in tight spaces.
Areas for Improvement:	Composure when shooting under pressure. Left-foot weakness, often avoids using it. Can occasionally be caught out of position during defensive transitions.
Recommended Plan:	Focus on finishing drills, especially one-on-one situations with the goalkeeper. Incorporate drills that force the use of the left foot for passing and shooting. Positional awareness exercises during defensive phase simulations.
